

Lexical scope and Scope chain ✓

lexical scope

variable & function
वैरियेबल & फंक्शन

→ lexical scope is a scope that

is determined by where variable and function are written in the code.

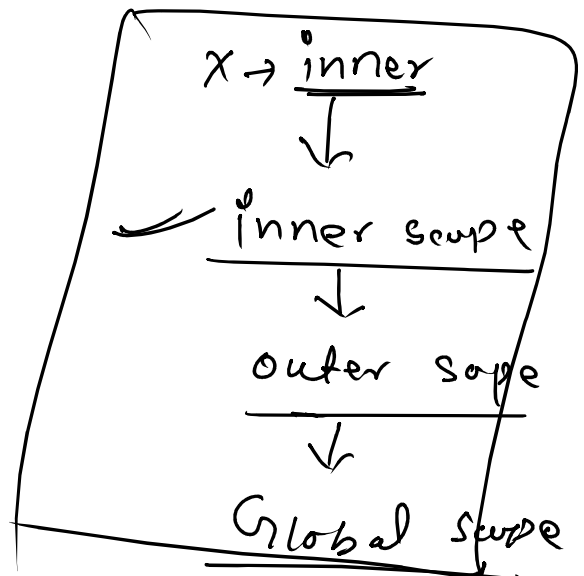

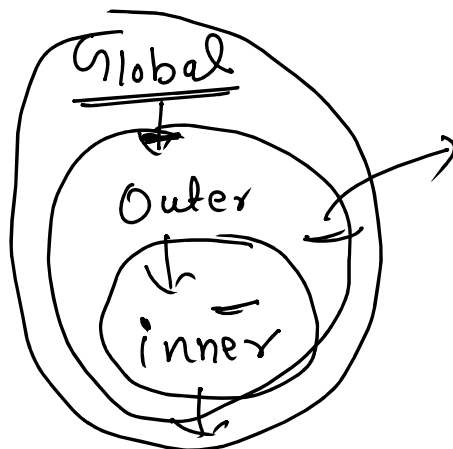

Scope chain

→ Scope chain is the mechanism JS uses to search for a variable in current scope and then its outer scopes

```
let x = 20;  
function outer() {
```

```
  function inner() {  
    console.log(x);  
  }  
}
```
