

Local Storage and Session Storage

✓ → setItem , → getItem → removeItem

✓ → clear() ✓

```
// localStorage
// setItem() => set items in localstoerage
// localStorage.setItem("name","Satyam")
// localStorage.setItem("age",23)
// getItem("key name") => get the data
// const localStorageName = localStorage.getItem("name")
// console.log(localStorageName)
// console.log(localStorage.getItem("age"))
// removeItem("key name") => remove the item from
```

```

localStorage
// localStorage.removeItem("name")
// localStorage.removeItem("age")
// clear() => remove everything from localStorage
// localStorage.clear()
// for array/object
// const user = {
//     name : "Satyam",
//     age : 24
// }
// JSON.stringify(user) => "{name:"Satyam",age:24}"
// localStorage.setItem("user", JSON.stringify(user))
// console.log(JSON.parse(localStorage.getItem("user")))

// sessionStorage("key","value")
// sessionStorage.setItem("name","Satyam")
// console.log(sessionStorage.getItem("name"))
// sessionStorage.removeItem("name")
// sessionStorage.clear()

```
